Basic Installation Instructions For The Quest Group PowerQuest Performance Enhancer/Surge Protector Connections

The Quest Group PowerQuest Performance Enhancer/Surge Protector should only be plugged into a grounded outlet. All connected equipment should be plugged directly into The Quest Group PowerQuest Performance Enhancer/Surge Protector. Using any extension cord in conjunction with The Quest Group PowerQuest Performance Enhancer/Surge Protector will void all The Quest Group warranties associated with this product.

LED Indicator Lights

The "Protection On" light should be on when the power switch is turned on. If this light goes out at any time, please consult the PowerQuest's User Manual for a list of possible reasons and actions. One portion of the PowerQuest's non-sacrificial surge protection is dedicated to a fast-acting extreme voltage shutdown circuit. If more than 140VAC is present on the incoming AC line for more than a quarter of a second, the circuit will instantly open a high-current relay that will disengage the AC power from all of the PowerQuest's AC outlets, activating the red LED "Overvoltage Protection" warning indicator.

Once the event has passed, or the building wiring fault has been corrected, the circuit will automatically re-engage.
